

wenaFlex® comfortPlus M Bed Base

The wenaFlex® comfortPlus M provides unique, ergonomic lying comfort. It can be adjusted to suit your needs thanks to a wide range of adjustment options. The low design means it can be integrated into virtually any bed frame. Head and foot sections can be electrically adjusted independently of each other. A wireless remote control is also available on request.

wenaFlex® comfortPlus bed base legs optional extra (price on request)

Characteristics:

- Inwardly bevelled beech laminated wood frame with dowelled and screwed corner joints
- 11 spring slats with 55 spring elements and 220 support points in the standard size of 90 x 200 cm*
- **Two-stage movable spring elements with soft zone and support zone** – depending on contact pressure – for pinpoint support and orthopaedically correct lying
- 4 flexible support points per spring element
- Individual elements can be lowered or raised using a **height adjuster** between spring slat and spring element
- With a **simple turning movement**, an **entire row of spring elements** (of 3 in total) **can be made harder or softer** in the lumbar/pelvic area
- Maximum flexibility: Head and foot sections can be electrically adjusted independently of each other.
- Emergency lowering in the event of a power outage
- Available in all standard sizes
- Maximum width: 140 cm; height: approx. 8.5 cm (in default position)
- Installation depth (incl. motor and frame): approx. 13 cm **
- Products can be custom-made on request

* The number of spring elements and support points may vary depending on the size and model of the bed base.

** For questions regarding installation depth and available space under the bed's lying surface, please contact the Wenatex customer service at kundenservice@wenatex.com
