

wenaFlex® comfortPlus R Bed Base

The wenaFlex® comfortPlus R offers the right support for every part of the body. The low design means it can be integrated into virtually any bed frame without compromising on lying comfort. The head/back section, which is quite long compared with other adjustable bed bases, can be raised easily. The long, adjustable foot section can be fully swivelled upwards.

Characteristics:

- Inwardly bevelled beech laminated wood frame with dowelled and screwed corner joints
- 12 spring slats with 60 spring elements and 240 support points in the standard size of 90 x 200 cm*
- **Two-stage movable spring elements with soft zone and support zone** – depending on contact pressure – for pinpoint support and orthopaedically correct lying
- 4 flexible support points per spring element
- Individual elements can be lowered or raised using a **height adjuster** between spring slat and spring element
- **With a simple turning movement, an entire row of spring elements** (of 3 in total) **can be made harder or softer** in the lumbar/pelvic area
- The inclination of the head/back section can be adjusted in 9 steps using a hand strap; the first three steps provide a slight elevation of the upper body in lying position.
- The long foot section can be fully swivelled upwards with a gas lift spring
- Available in all standard sizes
- Maximum width: 140 cm; height: approx. 8.5 cm (in default position)
- Products can be custom-made on request

* The number of spring elements and support points may vary depending on the size and model of the bed base.
